

## Jennifer Grand

Jennifer Grand was 23 years old when she first took a look at ACN. At the time she was a film student and a waitress devoting her free time to writing screenplays. "My plate was full and I didn't think I would have time for anything else, but I came to a meeting because my friend asked me to come as a favor and he was so excited!"

After the presentation was over, everything about ACN made so much sense that she immediately got started. Initially her lack of business experience made her question her ability to be truly successful in any arena including ACN, but after attending a National Training event Jennifer finally had the belief in herself and the training that she needed to be successful.

"I saw other people just like me having success and I realized this is a company where anyone who wants to be successful can be."

Jennifer did not want the long hours, inflexibility, insecurity and low pay that most people she knew outside of ACN were willing to settle for and she realized that by following the path that the majority of people she knew were on she would get the lifestyle that they had, that's why she was truly excited about ACN.

"When I took a look at ACN I had already been working full time since I was fifteen, so eight years in the workplace and I had nothing to show for it but tired feet and an unhealthy aggression towards my alarm clock. I needed something to work for me and I was ready to start following successful people!"

Jennifer committed completely to the ACN system, which is what she credits her success to today and obtained the position of Regional Vice President in just a little over a year. Today with teams growing throughout the United States, as well as several countries, Jennifer is a top producing Regional Vice President and has her sights set on hitting Senior Vice President.

"ACN allowed me to get all the money issues out of the way and enjoy a lifestyle I never dreamed possible. I was able to fire my boss, throw out my alarm clock, play poker and go to the movies whenever I want, and make more money in a month than I used to in a year!"

The best part is all the success I have had along the way has been directly tied to my ability to help a lot of other people have success along their way. It doesn't get any better than this!"
